Profile

Full Stack C# Developer

Completing the final months of a Bachelor of Science Degree in Software Development with an expected graduation date of December 2022. I have a passion for technology and strive to learn all that I can in a vast array of subject matter such as software development, computer forensics and network security.

Technical Skills

<u>Languages</u>	<u>Frameworks</u>	<u>Databases</u>	<u>Tools</u>
C#	.NET	MySQL	Git
Python	Django	NoSQL	Kemp Load Balancer
Docker			

Projects

Inventory System – [Git Hub Link](#) – C# .NET

Summary: Developed using Microsoft Windows Form Application and BindingLists to create a two-table inventory system with simple (add, remove and modify) controls.

OnMax– VBA

Summary: Excel bases scrip that took a CSV created and modified the data in the excel sheet depending on the specific department in question and turned a full day's bureaucratic busy work into a single click.

CPR-N-MORE Website – [Website Link](#) – HTML / CSS / JavaScript

Summary: Website developed for CPR-N-MORE as their primary web presence and class scheduler and payment platform.
